

The strategic alliance of two experts at the service of your trials networks.

Our experimental stations, equipment, and technical teams enable us to offer our clients tailor-made services for field crops across Europe.

VARIETAL EXPERIMENTATION:

- Line screening trials,
- Registration and post-registration variety trials,
- Trials on density, diseases, abiotic stress,
- Drone ratings and envirotyping.

PRODUCTION AND SELECTION SUPPORT:

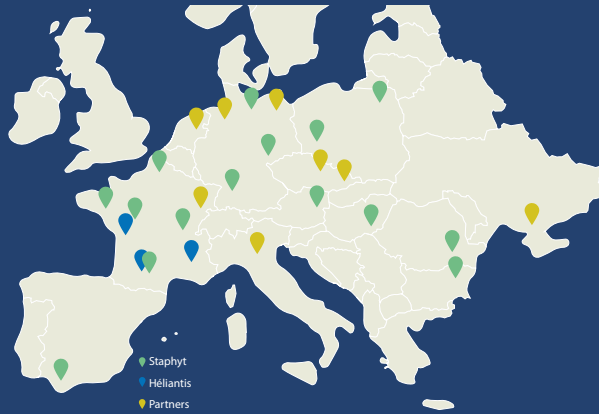

- Crossbreeding,
- Nurseries (lines, bulk, self-pollination...),
- Seed production (basic, pre-basic...),
- Production research.

POST-HARVEST PROCESS:

- Machining,
- Threshing,
- Cleaning, sorting,
- SEMAE-certified seeds.

A robust and reliable network of experimental stations

A fleet of high-quality equipment

For experimentation:

- A range of innovative equipment,
- A fleet of drones (NDVI and photos) mobile across all stations
- LITERAL pole,
- Satellites images, probes.

Laboratory services:

- Customized seed treatment,
- Post-harvest analysis,
- Inoculum production and pathogen detections,
- Tests under controlled conditions (temperature and water stress).

For seed production:

- Removable tunnels and cages,
- Drying units,
- SOC-certified qualified personnel,
- 3 sorting lines: micro-volumes, medium volumes, and processing.
