Pest Control

Supporting you in defining a smart and cost-effective regulatory strategy to bring your products to market successfully

With over **20 years of experience**, Staphyt provides worldwide support for the regulatory management of Biocidal Products and Active Substances. Our team of **120+ experts**, based in Europe, Great Britain, Morocco, Brazil and USA, guides you through all stages of registration: from **Active Substance approvals to Biocidal Product authorisations**, including national procedures, transitional registrations, BPR dossiers for single products, product families (BPF), Union Authorisations (UA), simplified procedures in all European countries, in Great Britain and Worldwide.

Thanks to our technical expertise, regulatory know-how, and international coverage, we help you deploy **tailored strategies, optimize costs**, and ensure the success of your projects in the Biocides sector.

Regulatory Affairs

- Advice and regulatory strategy
- Data Gap Analysis (DGA)
- Interactions with authorities
- Active substance, products and BPF dossiers
- Risk assessment for humans, consumers, animals and the environment
- Annex I listing and simplified procedure
- Technical Equivalence
- Literature search, QSARs
- Endocrine disruptors expertise
- Testing strategy and monitoring of GLP/non-GLP studies
- Classification and labelling
- National notifications and registrations

Laboratory Services

(GLP, non-GLP)

- Storage stability studies (shelf-life, accelerated & low temperature)
- Physical and chemical tests according to CIPAC, MT & OECD guidelines
- Development and validation of analytical methods (SANCO & SANTE guidelines)
- Analysis of active substances, impurities, metabolites, degradation products
- 5-batch analysis
- Ecotoxicological and E-fate studies
- *In vivo* aquatic endocrine disruptor studies
